ROLLING CURTAIN
DOUBLE-LEAF IN EI CLASS

ROLLING CURTAIN
DOUBLE-LEAF IN EI CLASS

Lightweight, flexible, fire-resistant rolling curtains in EI class are a solution that provides protection against both fire and thermal radiation. Two layers, wound on two shafts, The curtains are made with membrane technology using special multi-layered composition with outside gray fabric and features side reinforcements preventing detachment from the guides. Visible steel parts are galvanized, and the rest are corrosion-protected. The fire motors used ensure the curtain closes by gravity even in case of a power failure, and the integrated anti-fall protection allows for safe and controlled descent. For EI 120 curtains, a lower lintel is required than for single-leaf curtains.

PRODUCT FEATURES

lightweight, partially self-supporting structure

option to equip with a battery-powered control system

meet the criteria of EI₁ classification

can be integrated with Fire Alarm System

gravitational closing

SPECIFICATIONS

PRODUCT TYPE	flexible, rolling, double-leaf curtains
MOVEMENT DIRECTION	vertical
APPLICATION	closure of vertical openings in building partitions
FIRE RESISTANCE CLASS	EI 60, EI 90, EI 120
CERTIFICATION	CE 1812-CPR-1577 issued by Efectis [No. 1812]
HARMONIZED STANDARDS	EN 16034, EN 13241
CURTAIN WEIGHT	2,5 kg/m ²
DIMENSIONS	CE 8000 mm x 18000 mm / 9740 mm x 10000 mm (W x H)
MINIMUM INSTALLATION DIMENSIONS	lintel 520 mm sides 200 mm

OPTIONS

- smoke detectors, emergency release button, optical and acoustic signaling devices
- painting of steel elements in any RAL color
- anti-corrosion protection/painting in classes C3 to C5
- made of stainless steel
- safety edge
- execution in wind load resistance class 5 (1300 Pa)*
